# Best Practices

Internal Quality Assurance Cell (IQAC) plays a vital role in maintaining and enhancing the quality of the Institution and suggests quality enhancement strategies to be adopted. The two Practices institutionalized as a result of IQAC initiatives are as follows:

## 1. Signed two noteworthy **MoUs** with reputed organizations

- Signed a Memorandum of Understanding (MoU) with **Uttar Pradesh Athletics Association, Kanpur** so that both the organizations can collaborate for the development of athletes and provide them with necessary resources and support during tournaments at State and National level.
- Signed a MoU with **Vijnana Parishad of India, Orai** to develop the research ecosystem of the college in Mathematics.

## 2. Feedback Mechanism

The Institution has implemented a well-structured feedback mechanism where in we collect feedback from faculty members and students. Further the feedback is analyzed and subsequently action taken report is prepared by the respective committee of the Institution.

3. Dr. Praveen Singh, Assistant Professor, Department of Chemistry was selected for **Summer Research Fellowship-2023** through **INSA**, India to work under Prof. Arindam Mukherjee, Small Molecule Therapeutics Lab at IISER Kolkata on "Synthesis and Characterization of Fluorescent kinase inhibitors with more affinity to cancer cells." This research, conducted at the Indian Institute of Science Education and Research (IISER) Kolkata, aimed to develop targeted cancer therapeutics with diagnostic or treatment applications. By creating fluorescent kinase inhibitors, researchers hope to improve cancer cell detection and treatment efficacy. This project contributes to India's national scientific efforts in cancer research and molecular biology.

Saxena delivered a keynote speech on the topic “Mixed Boundary Value Problems and Saxena’s I-Functions”. He talked about the 2 mixed boundary value problems occur in several fields of Physics, Engineering and Biology. Mathematical solution of such problems lead to dual and triple Integral Equations having special functions as kernels. Successive development of dual Integral Equations results in advanced form with generalized hypergeometric functions as kernels. The solution of this type of equations leads to evaluation of the most generalized hypergeometric functions. Prof. B.V. Rathish (I.I.T., Kanpur) delivered “Professor J.N. Kapur Memorial Lecture” on the topic “Glimpses of Mathematics at the Frontiers of Science and Technology”. Prof. M.A. Pathan delivered a lecture on History of Mathematics. Prof. S.C. Agrawal delivered a talk about the importance of special function. Prof. Madhu Jain (I.I.T., Roorkee) delivered an invited talk on the topic “Performance Analysis and cost optimization of Fault Tolerance Machining systems with Reboot and Recovery” She told about the interest of the machining system operating under fault tolerance measures has influenced many Industries in need of high-quality products in every single modern area.
